22-29 September
Fira de Barcelona
Barcelona, Spain

Innovation from AUTEFA Solutions

HALL 5 STAND D 122

Nonwoven & Wool

Carding

- Modular concept for optimal application sets
- Card cover re-design enables easy maintenance
- Perfectly suited for PTFE & Carbon processing

Airley Card K12-DIRECT

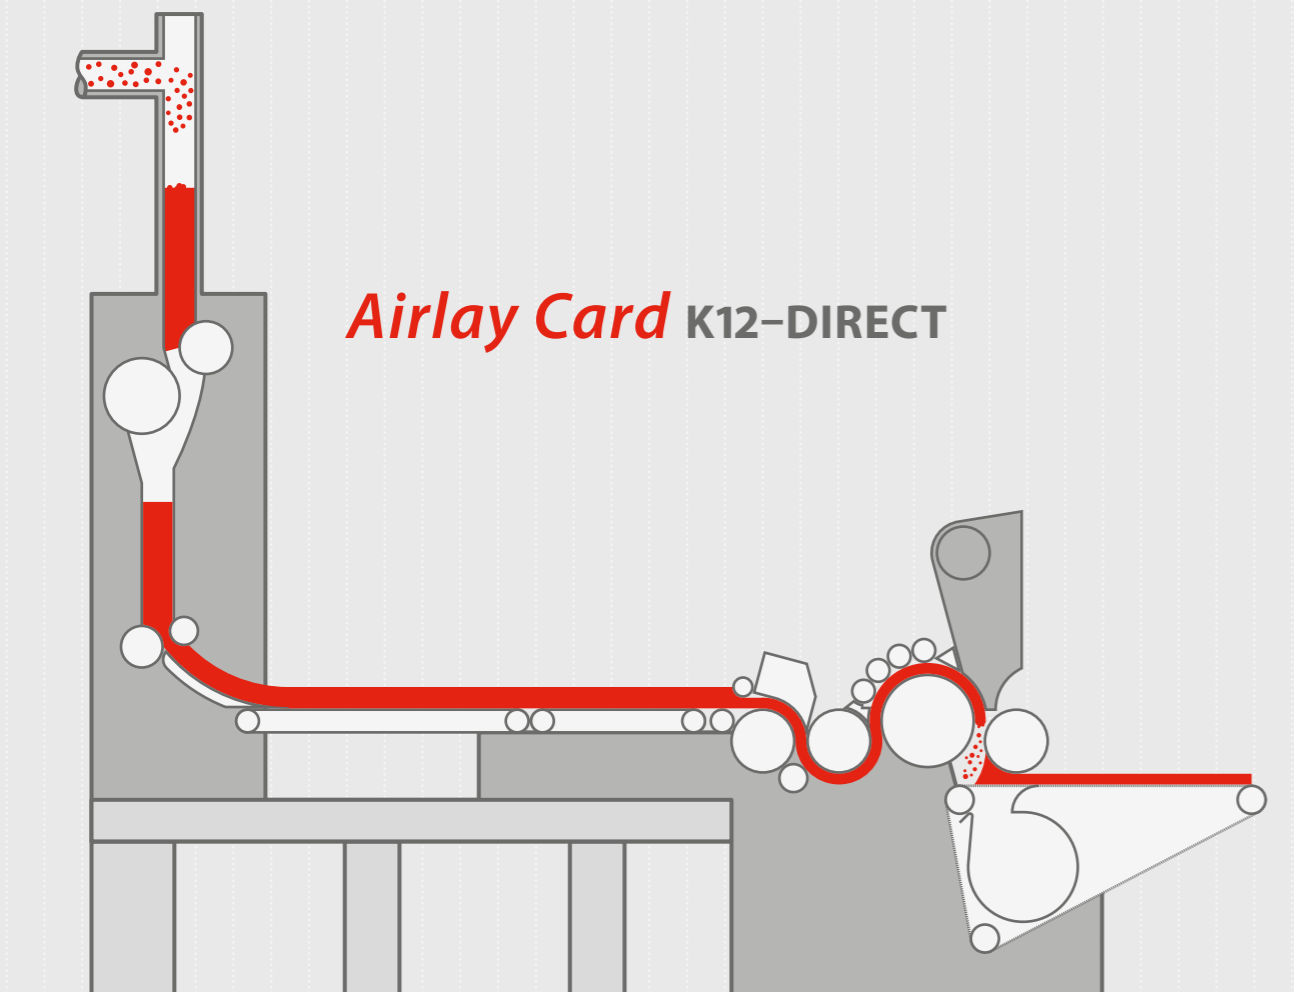

- Uniform chute feeding (CF)
- Integrated performance & quality booster (DIRECT)
- Modular executions for every application

Needle loom Stylus

- Unique drive system Varilptic
- Flexible adaption to different applications
- Intelligent needle board
- Optimized needle patterns (i-Point)

High Performance Cross Lapper

- Profiling and closed loop quality monitoring with WEBMAX
- Optimized motion control
- Self adjustment procedures
- Intelligent closed loop with scanner and card integration

BEING PRESENTED AT ITMA 2011

HALL 2 STAND D 107-109

Baling Technology

AD-WRAP (additional wrapping system)

- external packing
- PE-film stretch hood
- no fiber contamination
- for 1 – 3 balers up to 50 bales/h
- patent pending

Non-Stop-Ultra (single box baler)

- transfer of fiber without friction
- packing with PE-film or PP-woven fabric
- as single-box or uni-box solution
- short baling cycle due to less movements
- patent pending

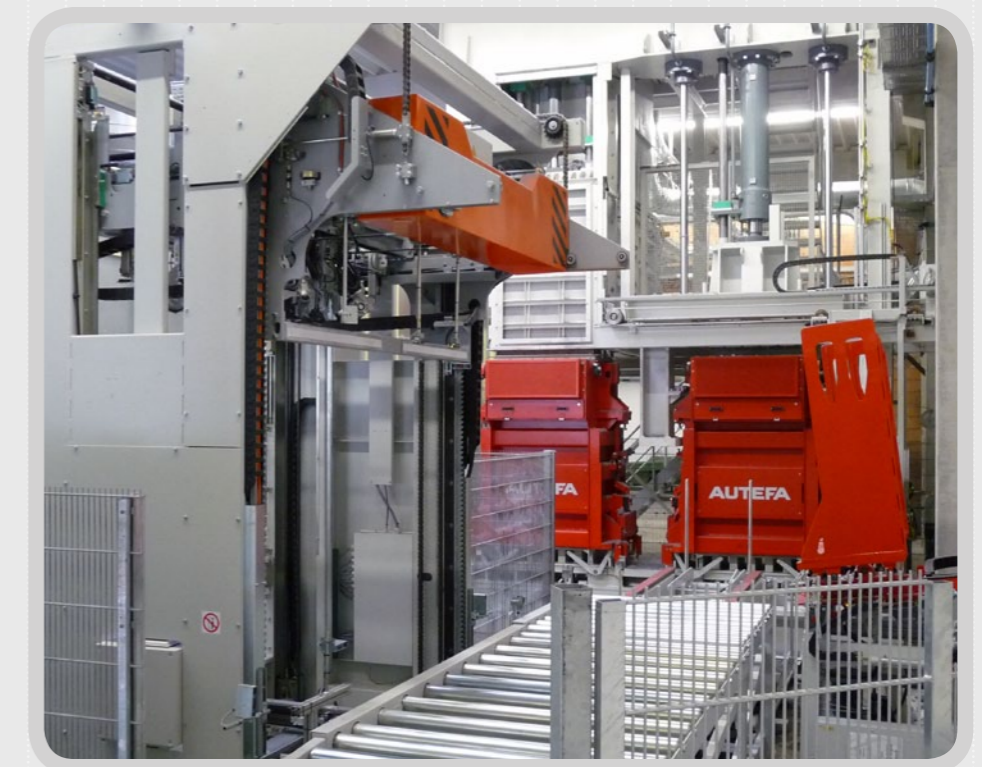

Twin Feeding (feeding unit)

- for high capacities fiber lines 240 – 300 t/day
- patent pending

Ultra Sonic Intra Power Wrap (welding device)

- welding of PP-woven fabric
- strong welding connection
- no burning or overheating

AD-WRAP
